	<p>Date: 8.31.23 Sample Type: Counter Sample Color: Med blue KTD: Kim Loehner KTD FIT EVAL STATUS: FIT NOT APPROVED- Follow Below Comments for Corrections. Submit to Kohls TD a revised fit sample within 7-10 business days of Decision Status Date.</p> <p>PATTERNS: Please attach a screenshot of before and after corrections with next sample fit round. Attach electronic pattern in One PLM as a .dxf or .aam (ASTM or AAMA) or .bw (Browzwear Vstitcher) file format. Browzwear file must be compressed into .zip file before attaching. Pattern should be exported without seam allowances and include a 10in. X 10in. square. Upload Fit sample patterns to the Fit Eval Page & Final Graded (zip .dxf pattern file with .rul grade rule file before uploading) PP patterns to the Attachment Page. Pattern should include a 10in. X 10in. square</p> <p>GENERAL COMMENTS: See comments and photos attached.</p> <p>1. Trim info - Preferred suppliers must be used for zippers, buttons, elastic, thread, and interlining. K-Link: https://link.kohls.com/resources/subcategory/preferred-suppliers - Any other trim types can be non-preferred supplier but must go through Kohls Approved 3rd Party Lab for testing/approval prior to production. K-Link: https://link.kohls.com/resources/subcategory/softlines all links found under K-Link>Resources>Private and Exclusive Brands (view all)</p> <p>2. Label Placement and attachment method: K-Link: https://link.kohls.com/resources/subcategory/labels-and-packaging</p> <p>CONSTRUCTION COMMENTS: 1. Confirm production will go forward w/ continuous rise. 2. Fray hem is 3/8" & stay stitch is on fray instead of on solid fabric. Pls correct. 3. Slit is removed at outseam. Busted outseam is not needed now. DI pg is updated. 4. Belt is added. POM length will be added once design chooses type of belt & tying. 5. Belt will need a 1" swift tack to CB waist to secure to sample in store.</p> <p>FIT COMMENTS: 1. Waist top edge needs to incr slightly from sample in order to meet waist placement. Not as big as spec. Bttm edge needs to meet spec. 2. Pls send 1st fit w/ Hip & Leg opg at spec. Even with the stretch back, we'd like this to look like a more relaxed fitting style. 3. Front bag width needs to incr at waist. It should be about 1/4" past the belt loop bartack going towards the CF. Current placement feels too shallow when putting hand in. Bttm width is ok. 4. Back leg near CB is very flat shaped. Pls see photo. Leg opg balance around thigh should be more even. 5. Incr bk rise spec (slightly smaller than sample). Shape feels nice to model, but with waist placement dropping slightly after waist circ is fixed, it can have some height taken off. 6. Incr pkt ht at side.</p>
